Fellowship through home winemaking: Share, Learn, Enjoy!

Make your Own Wine. Go for a Gold Medal.

- Have you recently started making wine at home but would like to learn more?
- Have you been making your own wine for a while but would like to meet up with other winemakers to share experiences?
- Would you like to start making your own Grape or Country wine at home?

If you answered yes to either of these questions, then the Eltham & District Winemakers Guild could be just what you are looking for! The Eltham & District Winemakers Guild can introduce you to:

- A welcoming group of winemakers with all levels of experience, some with a long tradition of artisan Grape and Country winemaking.
- Great learning, sharing and mentoring experiences to improve your winemaking skills. The Guild regularly runs winemaking classes.
- Fun and optional educational monthly meetings covering Grape and Country winemaking where your wine and the wine of others are appraised and constructive feedback provided.
- Social events including educational visits to wineries where we meet and chat with commercial winemakers.

When you join the Guild, you will be allocated a 'buddy' who is an experienced winemaker and is available to mentor you and provide advice whenever you need it. Also, you will have access to the guild forum, exclusive to members, where you can ask questions or pick up winemaking hints from the exchanges between members.

Until COVID, monthly meetings were held at the Eltham Living and Learning Centre starting at 7:45 PM with visitors welcome at any time. Recently we have been holding our meetings via Zoom. These have proven successful. that we will continue to use Zoom to broadcast our meetings once face to face meetings resume so that members not able to attend can participate and learn from our guest speakers.

If you are considering joining the Guild please do not hesitate to either visit our website (www.amateurwine.org.au) for more information or contact our Secretary Mario Anders via email (cheers@amateurwine.org.au)

OUR JUDGES - 2021 ELTHAM WINE SHOW

Introducing our Chief Judge Sandrine Gimon

Raised in Savoie, France, Sandrine graduated for the Diploma National Oenology in Reims after a 6-month internship at Veuve Clicquot Ponsardin. Worked at various wineries internationally. Settled at Rymill Coonawarra as senior winemaker for nearly 13 years. Now based with her family in the Yarra Valley, Sandrine is a consultant at Wine Network Consulting. She was a scholar of the AWAC in 2007 and the Len Evans Tutorial in 2017

Kirilly Gordon

Kirilly began her career in winemaking while doing work experience for a degree in Agricultural Science at the University of Melbourne in 1997. A fascination for the growing of grapes and the art and science of turning them into wine led to enrolling in the Charles Sturt Uni Wine Science degree and the offer of a winemaking job in the Macedon Ranges where she grew up. Many vintages later including two overseas, a finely tuned palate and love of fermentation of all kinds, she is the Winemaker at Witchmount Estate and has her own tiny wine brand called Bowerbird Wines.

Lisa Cardelli

Born in Tuscany and adopted by Australia (currently waiting for the Citizenship!), Lisa's love for wine started in Italy and has grown up here in Oz.

Over the years she has been cutting her teeth as sommelier in famous fine dining restaurants in Melbourne and progressed in her WSET studies. Lisa is currently holding a level 4 Diploma as well as being a certified WSET educator.

Her involvement in regional and national wine shows has allowed her to be more an integral part of the local wine industry and support this exciting and constantly changing industry.

Grant Scicluna

Grant Scicluna of Wine House Melbourne writes all communications and also contributes wine tasting notes on a freelance basis for wine distributors and wineries. Grant has represented Wine House in numerous international trade contexts including the Jackson Family Wine Symposium in California; Sauvignon 2019 and the Chardonnay and Sparkling Symposium in New Zealand. Grant was the Wine Scholar at the 2019 Australian Alternative Varieties Wine Show. He teaches consumer events and WSET Level 1 for Wine House.

Wayne Hewett

Wayne is a professional winemaker for Rebello Wines, a winery on the Mornington Peninsula associated with Sunny Ridge Strawberry Farm. He has judged at the Hobat (Australian) Fruit Wine Show, Cairns Fruit Wine Show as well as the Victorian Wines show.

Richard Martignetti

Richard has actively participated in various vintages with premium wineries in Australia and France, honing his craft, of which his hospitality and retail experience in the world of wine has been enhanced by the completion of a WSET level 3 certificate. Enthusiastically serving as a proud contributor to the EDWG as a committee member.

Annie Tang

Annie studied Global wine studies at The University of Melbourne and holds a WSET Level 3 in Wine. Currently looking after the Fine wine portfolio at Treasury Wine Estates.

Don Pople

Experienced Winemaker with a demonstrated history of producing award wining wines. Tertiary trained and highly skilled in all facets of Wine Production, Viticulture, Wine Judging, Food & Beverage Customer Service,

Leah Mottin

Leah holds a Masters Degree in Viticulture and Oenology, she then went on to complete numerous Domestic and International Vintages before landing a full time position as an Assistant Winemaker up in the Perricoota Wine region. After a number of years she moved down to the Yarra Valley as the Laboratory Manager at Domaine Chandon Australia.

Luca Barbon

Assistant winemaker at Sidewood, Luca has over seven years in the wine industry and has extensive knowledge of the winemaking process from harvest to production.

Peter Shone

Peter has been involved in the wine industry in Australia for 8 years. Having completed harvests in Marlborough, the Barossa and the Yarra Valley, Peter is now the Assistant Winemaker at Levantine Hill Estate in Coldstream. Peter has recently completed the WSET Diploma to further round out a global understanding of wine.

Duncan Moody

Duncan's background is as a sommelier and he has worked in resorts in the UK and Maldives and some of Melbourne's hatted restaurants. He currently work for TWE as part of the Luxury Brands sales team. He has been studying wine since 2004 and is a Certified Sommelier. He has passed all tasting exams and all but one theory exam for the WSET diploma. He has been involved with the Eltham Wine show since 2016.

Matt Talbot

18 years in the wine industry with backgrounds in Viticulture, Wine making, domestic and export sales. International wine source/buyer for the Joval wine group where I sourced and selected wines from various countries to be bottled in country or here in Australia. In 2020, in partnership with Kirilly Gordon, started the Patch wine brand based out of the Yarra Valley. Currently sales manager for Grapeworks & Tanium servicing the wine industry on all things consumables and machinery.

Notice of system changes - 1. Single Scoring 2. Class numbering

We have made the decision to change as we progress and mature our wine show and more closely align with other wine shows in Australia.

We have kept the scoring out of 20 points with one single result. Points are attributed for color, aroma and flavor, as well as more technical qualities including the balance of sugars, acids, tannins and volatile acidity. We are continuing with the judges comments which are critical to learning.

We have also upgraded our back end system to reduce the coding of classes moving away from the three digit alpha code. Our new classes now have a number and we have retained the same class descriptions.

Another Wine Show Delivered With Your Support – Wine Director's Comments

Once again, thanks to your support, we have managed to deliver the 52nd Eltham Wine Show despite very unusual and challenging circumstances. Like with everybody this year, planning for this show has been carried out without certainty as to what will allowed in the future. Despite all these challenges we have managed to have a show and provide winemakers with accurate and constructive assessments of their wines, which is the primary reason people have entered. Hopefully the days when we can once again have a show which is open to the public and can freely taste each other's wines are not too far away.

Judging Your Wines

As mentioned above, the primary reason people enter the show is to receive accurate and constructive feedback on their wines. Our panel of judges under the leadership of Chief Judge Sandrine Gimon is comprised of wine industry professionals with extensive experience judging the full spectrum of wine and other beverage styles. The panel has not only scored our wines, which is the usual practice at a wine show, but they have gone out of their way to provide constructive feedback. We really appreciate the extra effort they have gone to in order to help and support us, which is all done on an honorary basis.

Improve Your Winemaking - Meet Our Members

Like everything else in life, winemaking can be a lifelong journey where there is always room for improvement. If you are interested in winemaking and want to make the best wine you can, why not consider joining the Guild? The Guild has monthly meetings, runs courses, publishes a newsletter and members chat on social media. As a member you can get involved to the degree you want or are available, we even have members who reside in other states. Whatever your involvement, one thing is for sure, your winemaking will steadily improve and you will derive a lot of satisfaction from that. Please visit our website https://amateurwine.org.au or email our secretary Mario Anders, email: info@amateurwine.org.au for more information about membership.

Fellowship through home winemaking: Share, Learn, Enjoy!

Thank You

We thank Sandrine Gimon and her panel of judges for their time and contribution to the show.

We gratefully acknowledge the generous support of our many sponsors without whom this Show would not be possible. Please give your support to our sponsors whenever possible.

Our sincere gratitude goes to the very dedicated EDWG Wine Show Committee who contribute so much of their time and effort to the successful staging of this Show. Of course, the committee is competently supported by many guild members who volunteer considerable time to make the show a success.

And finally, thank you to all wine show entrants for your continuing support, hopefully we have met your expectations, if not let us know how we can improve.

Class

Class 4

Class comment

Shiraz Current

Class 1 a strong class. When the fruit is in good condition, some beautiful wines can be crafted.

Shiraz Previous

There were 3 main types of entry. Those which had a small fault which ruined enjoyment somewhat; those which were made from uninspiring raw material and the majority which were well made; although in some cases a little over oaked. Generally a pretty solid class but few outstanding individual wines. The most common faults found were volatile acidity, and reduction. This generally seemed like exposure of must to too much oxygen. We advise caution also with quality of fruit and ensuring that fruit is freeh and not everly rine.

Class 2 fruit and ensuring that fruit is fresh and not overly ripe.

Cab Sauvignon or Cab Franc Current

Lots of varietal definition in our last class of the morning. Lots of red and black fruit with leafy herbaceous characters underpinning the style. Not many microbial Class 3 issues showing good clean winemaking.

Cab Sauvignon or Cab Franc Previous

We would have love to see more structure on young examples. Look for some more extended maceration to build some tannin structure and flavour depth. In some instances the charred wood took over from otherwise wines with lovely fruit definition.

A fairly consistent and uniform class. Seems hard to make a terrible wine and hard to make a brilliant one. A couple of the wines were from overcropped vineyards Class 5 and showed uneven ripeness of fruit

Merlot Previous

Merlot Current

More interest than current vintage and greater variety of style. Fruit quality and character generally higher/ better. Better wines walked the right side of the line of Class 6 fruit outshining oak and providing support. Over wrought wines had harshness or were over oaked

Pinot Noir Current

Few faults, check your winery equipment and bottle closures. Concentrate on good fruit source, quality, seek out highly aromatic yeasts for inoculation to seek Class 7 more aromatic in your wine.

Pinot Noir Previous

A difficult class to judge with a number of wines not expressing varietal definition, however, there were some very expressive wines showing quality fruit and good vinemaking. A number of the wines showed good red fruit and oak integration.

All Blended Reds Current

Class 9 Solid line up, varietally sound, clear, bright fruit, some simple palates and harsh tannins, overall good representative sample

All Blended Reds Previous

There was a number of wines with some microbial issues, however the majority of wines were clean and expressive of their fruit with a deft use of oak. It was a Class 10 very good showing of mature, medium to full bodied wines.

Less Common Varieties Previous

Class 11 great bracket, some younger ones need longer aging, good potential, all varietally sound.

Less Common Varieties Current Uva Di Troia is going to be the next big thing. We hadn"t tried this variety before but loving it! The Durifs generally didn"t seem to be varietal, almost making them Class 12 too light? Some very good, thoughtful winemaking in this class though. **Rose Any Variety** Nice bright fruit characters, watch sulfur and oak usage, overall true to variety, a number of different styles of rose throughout. Class 13 **Riesling Traminer Pinto Gris** A strong class. No faults per se but one tired bottle and one amber style which is challenging to judge against other varietally precise and clean wines. All wines had Class 20 fruit precision; most had good structure. Several had interesting phenolics. Impressive. **Chardonnav Current** Evidence of good clean fruit. A lovely bracket to start the morning off. Lots of varietal characteristics and a number of good examples of Aussie Chardonnay with Class 21 zesty citrus and yellow orchard fruits. **Chardonnay Previous** Class 22 Generally try to manage the correct levels of SO2, in some instances the acidity balance and the oak usage. Less Common White Varieties Class 23 Many well made white wines that can be difficult on a small scale. Some great representations of varietals All Blended Whites An architect or a fine taylor would probably have an advantage if they were trying to make a blend of wine. When all the parts are in good measure, a blend can be powerful, perfumed, long. Good diversion of style in this class. Class 24 Sweet Grape Wine Still Class 30 Moscato looks like the perfect variety for a sweet style. Sparkling Grape Wine A class that is probably one of the most technical in the show. When you consider all the moving part that must aligned to get a good balanced result. The gold Class 31 medal does that in an elegant and knowledgeable way. **Fortified Grape Wine** In many examples the spirit base was overpowering the style, in others spirit levels were too low that the wines appear as dessert style rather than fortified. Spirit Class 32 base guality also seems to be the issue in few examples. However the two gold are testament of true mastery Berry Wine It is often said that a raspberry wine will win the gong, but not n this case, because too many of the raspberry wines lacked finish. We would like to see a fuller range of berries next year. Genrarally only leffer faults presented. Class 40 **Stone Fruit Wine** Class 41 Generally and technically a sound class. One standout wine that showed elegance and restraint grabbed our attention.

Herb, Grain, Flower or Veg

Class 42 The best class of the country wine show. The Saki was the standout.

Other Country Fruit Wine
Class 43 A class that still shows promise. We encourage to pay attention to overall balance and finish.
Sparkling Country Wine
Class 45 Two high standard sparkling drinks.
Liqueur
Class 50 Strong class, a pleasure to judge. Many varietal examples and good balance with the spirit. Only few showed too much sweetness or light alcohol
Mead Joes Ancient Orange
Class 61 A beautiful example in the first exhibit shows just how far this guild has gone in 5 years. Well done.
Mead Melomel
Class 62 A little dissapointing, with the top scores definitely showing the benefit of fruit depth and technique
Other Meads
Class 65 A generally well executed class with most entrants receiving a reward. A pleasure to judge.
Cider Dry Sparkling
Class 71 Some interesting ciders showing good technique . Don''t be afraid to attempt sweeter styles.
Kombucha Unflavoured
Class 80 Small class.
Kombucha Infused
Class 81 Two good examples. Balance and well made with flair.

COMMON WINEMAKING FAULTS AND THEIR CAUSES

Incomplete Primary Fermentation

An enzymatic test for glucose and fructose is the only way to be completely sure that primary fermentation is complete. Incomplete primary fermentation is often noticed as cloudiness in wine, potentially with loss of colour, stale or oxidised characters can be apparent as well as the presence of CO2 in the wine. When oxidation is more advanced, acetaldehyde may be evident. These problems often manifest themselves shortly after the wine is racked, presumably because the aeration caused by racking stimulates yeast activity.

Insufficient SO₂

Insufficient SO₂ manifests itself as either microbiological instability or oxidation of the wine. When adding SO₂ it is important to understand that the effectiveness of any addition will be determined by the pH of the wine. In addition, it is the 'free' rather than the 'bound' SO₂ that infers anti-microbial and anti-oxidative protection, and only part of any addition will yield free SO₂. The level of free SO₂ in the wine will fall significantly during racking and gradually over time in storage and in the bottle due to oxidation.

High pH

The pH of picked grapes can vary considerably. It is important that the winemaker makes adjustment as soon as possible to ensure the pH of the must and wine remains within the target levels recommended below. Note that with higher pH, SO₂ becomes less effective, and the growth of potential spoilage microorganisms is favoured.

Red Wine: Must (pH3.30-3.45), Finished Wine (pH3.55-3.60)

White Wine: Juice (pH3.15-3.30), Finished Wine (pH3.30-3.45)

Incomplete Malolactic Fermentation

As with incomplete primary fermentation, completion of malolactic fermentation should always be confirmed with an enzymatic test. The consequences of the growth of bacteria in wine are similar to those caused by yeast growth, described above for incomplete primary fermentation.

Inadequate Clarification

Many wines are now bottled without filtration because of the perceived negative effect on wine quality. Some of these wines may form a haze which may be due to suspended yeast or bacteria, both of which are capable of forming hazes that do not readily settle or form a deposit in the bottle. If a slight negative effect on wine quality does occur due to filtration, it is greatly outweighed by the possible negative effect of wine spoilage that may occur if the wine is not filtered.

Wine Additives

Wine instability and problems can be caused by wine additives. Use products that are specifically recommended for use in wine, perform bench trials on a sample of the wine and check and re-check calculations before any additions are made.

COMMON WINE FAULT TERMS

"V.A. (Volatile Acidity or Volatility)": The smell of vinegar (Acetic Acid and /or nail polish remover (ethyl acetate). Can arise from poor storage practices that exposed wine to air.

"Aldehyde": Similar smell to Fino Sherry and is the result of either oxidation or microbial spoilage and if left untreated will normally result in V.A.

"Oxidised": When wine is exposed to the air the fruit aromas and flavour become muted, not as apparent; the wine might also be described as tasting "flat" or "flabby". The wine might also have a brownish colour and show similar characters to "Volatile" and/or "Oxidised" wines.

"H₂S (Hydrogen Sulphide)": The smell of rotten eggs produced by yeast during fermentation generally caused by a lack of nitrogen in the ferment or excessive use of sulphur in the treatment of the grapes prior to ferment (e.g. sulphur based sprays in the vineyard). Use sufficient nutrient at the correct times during primary fermentation. If not treated properly (with Copper Sulphate) H₂S can lead to the more serious problem of Mercaptans (rotten vegetable aromas).

"Bret character" (Brettanomyces): An unpleasant "barnyard" smell (may also be described as a "horsey" smell). Generally, the result of storing wines in contaminated barrels. Clean and sanitise storage vessels carefully.

"Corked": Refers to a mouldy, musty, wet newspaper, dank characters. Results from the mould in corks in conjunction with chlorine forming a compound called Trichloroanisole (TCA), which remains in the cork and taints the wine. Avoid using chlorinated water and chlorine based cleaners. A wine sealed with a screw cap cannot be tainted with TCA, by the selected closure itself.

"Green": Young wines, which are unbalanced because of excess acid (generally Malic Acid), made from grapes which have not fully ripened. Only use high quality, properly ripened grapes. If you can, ask the grower to advise sugar and acidity levels of the fruit before you commit to using it for your vintage.

"Astringency": Gives an unpleasant puckering, drying, tactile sensation in the mouth due to high tannin content absorbed from skins and seeds. May be caused by excessive contact with skins and/or seeds during primary ferment. Rough tannins may be due to the use of poor quality oak. Manage skin contact appropriately and use only high quality oak.

"Unbalanced": A balanced wine has alcoholic strength, acidity, residual sugar, tannins and fruit characters which complement each other so that no single one of them is obtrusive on the palate.
